Subject: The Carson SC-407 Enforcer Full Featured Light and Siren Controller

Carson Introduces the NEW UPDATED SC-407-20 14 ENFORCER Siren

Indianapolis, IN – Carson Sirens is proud to introduce the updated **SC-407-20 14 Enforcer** full featured light control siren. This faithful standard received a face lift and some internal updating to make it as competitive as the rest of the stable of rugged and reliable sirens Carson Manufacturing Company, Inc. has become known to manufacture. Traditional rotary switch siren control knob and rocker switches with the 20 amp circuits for primary light control make this unit an easy choice for the economical buyer in need of a light control siren. New blue LED backlighting for operator visibility at nighttime.

The SC-407 **ENFORCER** Siren gets the job done. Available end of April.

SC-407 ENFORCER FEATURES

- 100/200 watt amplifier with 140 amps of light control
- Lever/slide switch with 20 amps capacity per switch and 80 amps total capacity
