Subject: The Carson SC-411 Elite Force Series Handheld Light and Siren Controller

## Carson Introduces the NEW HANDHELD SC-411 *Elite Force* Siren

**Indianapolis, IN** – Carson Sirens is proud to introduce the new **SC-411 Elite Force** handheld controller to the series featuring **QuickClone®** duplication technology making it an easy and ideal application when you need total control right in the palm of your hand. Select between the handheld dual tone model, requiring 2 speakers, or the 100/200 watt single tone handheld controller. Don't be fooled, this series is small in size, but large on functionality. Rugged and reliable is the reputation that Carson Sirens has come to be known for and this series does not disappoint.

The **SC-411 Handheld** Series was developed for those who need total functionality in the palm of their hand. Both of these new units come with premium style and design with superior capabilities. They include **QuickClone®** duplicating technology which makes the programmed settings transferable from one unit to another without the need of a computer, making this ideal for fleet's installations. **New blue LED backlighting along with a custom cradle for mounting included.**

SC-411HD-10 14 Dual Tone (200 watt) shown above.  
The SC-411HS-10 14 Single Tone (100/200 watt) version is also available.

### AVAILABLE NOW

These two new units are new to the stable of already successful sirens in this series. Built "Tough to the Core", these new handhelds exceeds the same high standards for quality and performance that you have come to expect and know from Carson Sirens. When it comes to performance, ruggedness and reliability Carson Sirens are always the sound performer.

Highlighting the **SC-411 Elite Force** Series is the **SC-411HD-20 14** handheld dual tone siren. This siren gives you dual tone, full emergency warning system control with superior style and design. Face programmability along with selectable siren tone options. The rugged splash resistant face protects internal circuitry from liquids. The **SC-411** series has incorporated all emergency lighting and arrow stick control, including gun lock timer as well as video camera system control. Three primary control buttons act as a slide switch with the same functionality. This unit will give you maximum options and controls all in the palm of your hand. Control head has dimming button so the user can tailor the blue LED background to their preference.
