SIRENS

“The Remote Siren That Clears the Way”

The **SC-1012 Volunteer** 100-watt remote siren with light controls was designed with the volunteer firefighter in mind offering complete versatility. This unit gives you flexibility in the placement of the remote switch panel and amplifier. The remote switch panel features two 3-position rocker switches to select between wail, yelp, manual, and mechanical tone. A momentary rocker switch for air-horn and phaser with the European HiLo/two-tone sound as an optional substitute. The siren also features the Horn Ring Cyclers (HRC2) function that enables the driver hands-free control of the siren by cycling through the tones with the vehicles horn. Two lighted rocker switches are also included for controlling emergency lights.

The siren is installed with a detachable connector for the power, speaker and remote switch panel. The siren tones may be changed or disarmed using a Dip switch. The light switches are capable of switching up to 20 amps. This siren is designed to work with a 100-watt speaker and ensures you the strength to get you where you need to go and be heard like one of the big fire trucks. The remote panel may be mounted with holes in the top or bottom. As with all Carson Sirens products, the **SC-1012 Volunteer** is backed by a no-hassle 5-year limited warranty.

The **SC-1012 Volunteer** Remote Siren offers the reliable performance, and rugged durability with consistent quality that comes with every Carson Siren.

- **Mechanical Tone:** This sirens deep and gutsy mechanical tone allows you to sound just like a fire truck clearing traffic. This siren will set you apart from the rest.
- **Lighted Rocker Switches:** Two lighted rocker switches for controlling auxiliary lighting.
- **Horn Ring Cyclers 2:** Allow the operator the capability to run the siren tones from the vehicle horn ring or other external switching for hands free tone selection during pursuit or rescue situations.

***The SC-1000 Series offers
“a small siren with big results”.***

SC-1012-20 VOLUNTEER

Specifications

Siren	
Input Voltage	9 - 16 VDC (negative ground)
Input Current	8 Amps @14 VDC
Standby Current	Less than 10mA
Output Power	105W RMS Max (@15 VDC - single 100W speaker)
Siren Frequency	700Hz - 1500Hz (Mechanical 700 Hz - 1600Hz; Two-Tone & Horn = 435 & 585Hz)
Tones/Cycle Rates	Horn = 109 CPS, Mechanical = 5 CPM, Wail = 13 CPM, Yelp = 190 CPM, Phaser = 15 CPS, Two-Tone = 60 CPM
High Voltage Protection	16 - 18 VDC output ceases, resumes at normal level
Short Circuit Current	50 Amps Min. from supply circuit
Operation Temperature	-15F to 140F
Controls	Two 3 Position rocker switches, 2 position rocker momentary Horn and Phaser, auxiliary input for +/- activation, 8 position DIP switch options selector
Siren Connections	Removable 12-Pos Terminal Block: (2) Power, (2) Speaker, Auxiliary inputs, (6) Control switch inputs.
Light Control	
Voltage	9 - 16 VDC (negative ground)
Controls	Two lighted rocker switches in control panel.
Auxiliary Switch Current	20 Amps max per switch (externally fused)
General	
Size	Control Head 4-1/2" Wide, 1-3/4" Deep, 2" High Amplifier: 6" Wide, 4-1/4" Deep, 1-7/8" High
Shipping Weight	2 Lbs
Ratings Met	Class A Sound Level, California Title 13, KKK

Features

- Compact 100-watt electronic siren amplifier with 20 amps of light control
- Two illuminated rockers for light control
- Siren Wail, Yelp, Phaser, Manual, Air Horn, and Mechanical tone with optional European HiLo/Two Tone siren tone
- Rocker switch siren function control with momentary rocker switch override
- DIP switch programmable tones
- Horn Ring Cyler (HRC2) for hands free siren tone control
- Amplifier and light controls fused separately and externally
- Short circuit, high voltage and reverse polarity protection systems
- Detachable wiring connector
- Small amplifier size with flange mounting
- No hassle 5-year limited warranty
