

TECHNICAL BULLETIN

SUBJECT: SC-550-10 Hand Control Legend Labels
BULLETIN #: 0337 Rev.A
RELEASED: 05-14-03
UNIT S/N: All
MODULE S/N: N/A

This Bulletin describes how to install the legend labels onto the SC-550-10 Hand Control. Multiple legends are supplied on a single sheet. The single sheet of legend labels is part number CP4895.

Different legends may be selected to match the device controlled by the auxiliary output switches 1 - 4.

Select the legend and place centered over the legend area. Press down on the legend to stick over clear window and tuck under rubber framing. Gently lift up on the sides of rubber framing to help cover the edges of the legend.

To remove a legend, use a thin edge to gently push rubber frame aside and pry between legend and clear window. Try not to puncture clear window. The stick-on adhesive is strong.

Blank (black) legends are provided for aux output switches with no function. The white background legends may be written on with permanent marker to create custom legends.
