Carson releases the SC-1022 Hand-held Mechanical Tone Siren for Volunteer Fireman

Indianapolis, IN – Carson Sirens is proud to announce the release of the SC-1022 Hand-held Mechanical Tone Siren for the Volunteer Fireman. This hand-held remote 100-watt siren with light controls all in the palm of your hand, ideal for the volunteer that wants the siren out of his way when not in use. The hand control can be hidden away when not needed. The SC-1022 Volunteer Hand-held offers the standard siren tones and a mechanical tone giving you full coverage for those emergency situations. The rugged, and reliable amplifier offers exposed fusing on the back side, along with outputs for lights. This siren is dip switch programmable for different tones. Remote amplifier offers an output indicator on the face for diagnostics. This new hand-held remote will be available at FDIC 2008 held annually in Indianapolis, Indiana the week of April 7th

The **SC-1022** VOLUNTEER

Don't forget the other models of the SC-1000 series in either the self contained console mount or the space saving remote mount. As all the Carson Sirens, the new SC-1000 Volunteer series include a no-hassle 5-year warranty. Carson is known for its consistent quality, rugged, reliable sirens and this new series lives' up to that standard.
